EDUCATION

Indian Institute of Information Technology, Bhopal

August 2024 – May 2028

Bachelor of Technology – Information Technology

CGPA: 7.97

Relevant Coursework: Data Structures and Algorithms, DBMS, OOPs, Linear Algebra, Statistics and Probability

SKILLS

- **Programming Languages:** Python, C++, C
- **Technologies:** Flask, MySQL, Pandas, NumPy, Scikit-Learn
- **Tools and Platforms:** GitHub, Amazon Web Services (AWS), Google Cloud Platform (GCP), Jupyter Notebook, VS Code
- **AI Tools:** ChatGPT, Claude, GitHub Copilot, Cursor, Ollama

PROJECTS

Data Management API | Python · Flask · Postman · MySQL

[GitHub](#)

- Designed a **RESTful API** backend with Flask and MySQL, implementing **stateless architecture** and **resource-based routing** to ensure maintainable, modular codebase aligned with REST design principles
- Engineered **normalized database schema** with indexing strategies, improving query efficiency and storage optimization across relational data models
- Validated **10+ API endpoints** using Postman, ensuring **data consistency** and synchronization integrity across the MySQL backend

ML Classification Pipeline – Diabetes Predictor | Python · NumPy · Pandas · Scikit-Learn · Streamlit

[GitHub](#)

- Developed an end-to-end ML classification pipeline applying **Logistic Regression** on 700+ samples with 8020 train-test split, achieving 67.5% classification accuracy
- Designed a scalable **preprocessing workflow** encompassing **EDA, feature scaling, and standardization** using Pandas and NumPy, structuring modular pipeline stages to maximize data quality and model readiness

Offline AI Inference System | Python · Ollama (Gemma 3B) · Asyncio · Streamlit

[GitHub](#)

- Architected an **end-to-end offline LLM** inference pipeline using **Ollama (Gemma 3B)**, guaranteeing **100% data privacy** through complete elimination of external server dependencies and API calls
- Optimized **prompt processing pipeline** using **Python Asyncio**, enabling non-blocking inference calls and improving response latency across real-time conversational workflows
- Built a Streamlit interface enabling intuitive interface for real-time user queries and model responses, adopted by **15+ users for secure, offline AI access**

ACHIEVEMENTS

- Secured **1st place** among **2100+** competing teams in Hacksagon, organized by ABV-IIIT Gwalior
- Ranked **5th** among **200+** finalized teams at HackAxios, organized by IIIT Bhopal
- Achieved a **2-star CodeChef** rating (peak 1545) with a **global rank of 492** among **30,000+** participants
- Achieved a **5-star in Python** on HackerRank
- Solved **500+** DSA problems across [Codechef](#), [Leetcode](#), [Hackerrank](#)

LEADERSHIP & VOLUNTEERING EXPERIENCE

- Core Team Member, Arunoday-**social welfare club**, IIIT Bhopal: Led a community drive reaching **100+ women** and **mentored 150+ students** through career guidance session
- Core Team Member, Aarzoo-**cultural club**, IIIT Bhopal: Coordinated the planning and execution of **5+ cultural events** and performed in college events
- Core Team Member, GDG-**technical club** IIIT Bhopal: Organized technical workshops and speaker sessions for **200+ students**

ADDITIONAL

Spoken languages: English, Hindi, French
